**TORQUE**   
PARTS 

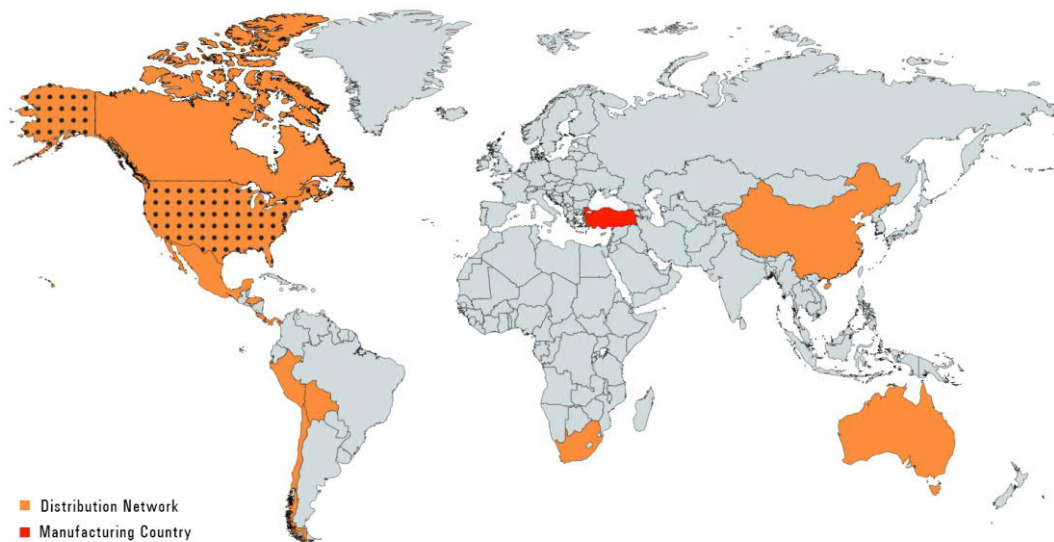

Torque Parts LLC was founded in 2012 to provide the heavy-duty aftermarket with the highest quality air springs at better prices. After working with some of the biggest offshore air spring manufacturers around the world we felt the need to invest in our own air spring manufacturing plant that only focuses on the high demands of the U.S. market and in a short amount of time we started exporting to Australia, Canada, South Africa Central and South America.

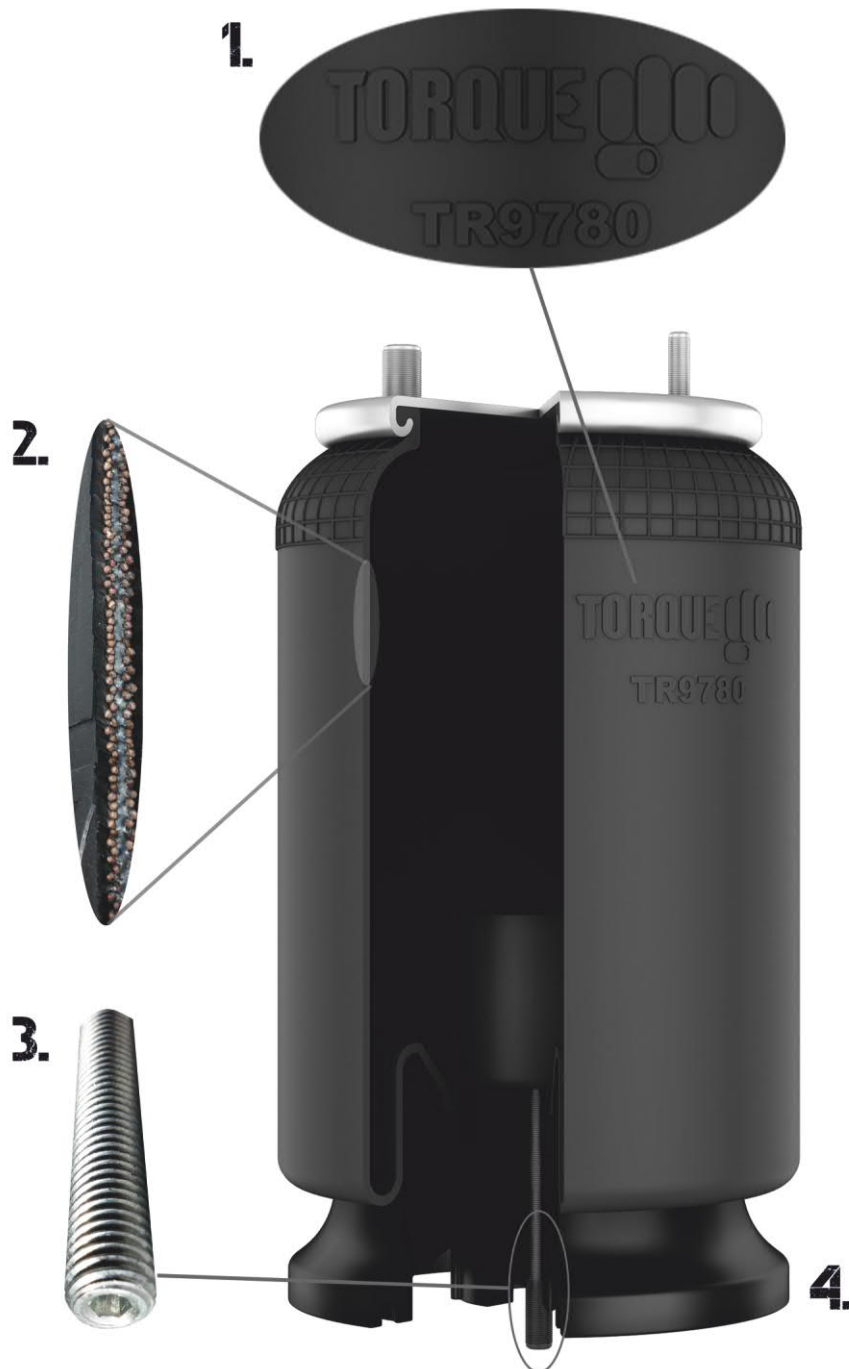

Since 2015 we have been manufacturing and extensively testing our air springs against OE standards in the US. This enables us to monitor the quality of our products, respond faster to our customers' changing needs and keep our prices competitive. While increasing our distributor base around the country, we also incorporated our importing experience to other product categories in order to help our customers.

We now ship over 160 different types of air springs and 700 different types of air brake, body / cabin and wheel-end products from our warehouse to our distributors around the country. We continuously expand and improve our product range based on our customers' needs.

Our distribution network keeps expanding year after year as our customers see our dedication and the quality of our products. With an average 30% consistent growth rate over the past 7 years, Torque Parts is one of the fastest-growing companies in the heavy-duty aftermarket.

## Our **Factory** and **Distribution Network**

1. Easy to identify part number permanently engraved on the rubber.
2. 4.5-5.0 mm thick rubber that exceeds OEM requirements.
3. 25% stronger 4140 grade steel studs.
4. Stronger composite pistons.
5. Highest leak test ratio after final assembly.

**CABIN AIR SPRINGS**
